Hosted Mail Protection

Block spam and viruses in the street.

Why dedicate your valuable equipment to managing thousands of spam and virus-laden emails?

Our *Hosted Mail Protection* solution blocks those emails at the internet — before they enter your network — and lets you manage them through a secure portal.

- **Easy-to-use configurable spam management tools** such as one-click mail release and white-listing.
- **Robust integration with a wide array of mail systems** lets users easily manage *all* their mail from within their customary email software.

Full Setup and Integration Support

We want your hosted solution to be a success, and to be easy for your staff to use. From mail client integration to training, we'll help you at each step.

Full Service and Automatic Updates

Hosted antivirus/spam updates are automatic and unobtrusive. And our friendly technicians are available to assist with issues.

Single-Sign-On Feature

Manage your spam queue seamlessly without needing to log in. Available for many mail clients.

Customizable Portal and Filters

Manage your spam notifications, whitelists and blacklists through an easy-to-use, secure portal.

Full Reporting Tools

Understand the value of your antispam solution with customizable charts and reports on spam and virus volume.

Portal Protection

All ingoing and outgoing email queues through an independent portal, so spammers can't locate your IP address, and your outgoing email is protected from unnecessary blacklisting.

On-Demand Mail Hosting

Should your email server go down, our hosting solution allows you to read, reply and create email, and continue vital business communications.

Why a Hosted Mail Protection Solution?

Your Outlook client manages junk mail, and your PC's have antivirus software... *so, why go with a hosted solution?*

- **Block spam before it bogs down your important mail server** with thousands of messages per day.
- **Block viruses before they find the PC whose antivirus isn't working**, and protect your entire network.
- **Access your mail *even if your mail server is down***, through a fully functional hosting queue that allows you to read, reply and create new email from any internet connection.
- **Mask your IP address from spammers AND prevent unnecessary blacklisting of your outgoing mail** through our centralized internet portal.
