Zn

ZINC™ Managed Backup

Protect yourself come what may. Backup tapes fail. Fires happen. Employees forget. Protect your company files and databases, no matter what humans and nature may bring.

- Business continuity made simple — Burgess Zinc uses 256-bit AES security and multiple data centers located thousands of miles apart to ensure data protection and availability from anywhere with internet access.
- Budget bliss — eliminate aging equipment concerns and costs, and staff backup management hassles.
- Proactive monitoring catches backup problems before they cause a problem.

Dedicated Expert Support

Our dedication to customer support sets us apart. Our resources are committed to delivering the highest level of service and support.

Complete and Fast Setup Service

We take care of all aspects of configuring your backup software installation. We work with you throughout to make sure your backups capture what you need, every day.

Secure Storage and Transfer Solution

Secure transfer and storage encryption, and reliable offsite storage make sure your data stays safe, and is ready should you need it.

Get it All! — servers, PC's, Exchange/SQL databases, at all your locations.

Pay only for the storage you need, and include all your important devices and files. We work with you to capture all your business-critical data.

Recovery Services

We assist with data recovery and restoration, including Exchange mail. When disaster strikes, we're with you.

Affordable, Scalable Solution

No equipment investment, and a scalable monthly payment let you plan your IT investments wisely.

Daily Monitoring and Repairs

If a PC isn't backing up a file correctly, we'll let you know and work with you to repair the issue, at no extra charge!

Everything Backup Should Be.

Easy. Automatic. Offsite. Device-Independent. With 24/7 Support.
Everything you need to prepare for anything that happens.

- **Secure, redundant, online storage.** Be it a regional disaster or a busted sprinkler system in the server room, it's better that your backups and backup support is accessible when your building or people may not be.
- **Device-independence.** Even if you took the backups home, how long will it take to get a new tape drive to restore them? Online storage means your data is available immediately.
- **Working, all the time.** If you change a file, that file gets backed up to offsite storage, automatically. If not, our monitoring services find out, and let you know.
